08820 1000 mg/ 10 mL vial 3 vials/ box

Dosage and Administration

Irrigate wound with normal saline solution.

Either pour contents of vial or dispense from syringe to withdraw solution and cover wound site.

Cover with a non-adherent dressing such as PUF (polyurethane film) or Telfa®. Note: Subsequent applications of Chondroprotec can be injected through the dressing as to not disturb the wound bed.

Reapply Chondroprotec daily and redress wound site every 5-7 days or as needed.

Features

1000 mg of PSGAG in a 10 mL vial (100 mg/mL)

Derived from bovine trachea

Preservative free

Patented technology

Caution

Not for food animal use.

Not for human use
