

## Canine and Feline

VetOne® Canine/Feline Aerosol Chamber is designed to deliver medication into the lungs enabling owners and trainers to take better control of their animals' asthma. Cross Valve Technology™ allows animals to easily breathe out through the chamber. One way flow prevents exhaled air from going into the spacer.

| ITEM#  | DESCRIPTION                           | SIZE   |
|--------|---------------------------------------|--|
| 520200 | 3 in 1 Canine Aerosol Chamber Inhaler | Each/small, medium and large canine masks included |
| 520201 | 2 in 1 Feline Aerosol Chamber Inhaler | Each/small and medium feline masks included        |

### BENEFITS

- Cross Valve Technology™ ensures very low resistance when inhaling medication
- Transparent chamber means you can see the valves working properly
- Multipurpose mouthpiece can be used with standard face masks
- Less inventory required with multiple size masks included with each unit
- Universal inhaler base
- Dishwasher Safe
