

# GLYCOFLEX®

## STAGE 2 Moderate Strength

Perna, Glucosamine, MSM and DMG for intermediate joint support

**GlycoFlex® 2 Canine** represents Stage 2 of our comprehensive stage of life program for dogs needing moderate joint support. It's also recommended for adult and maturing dogs, sporting breeds, and working breeds, as well as well as a follow-up to support normal recovery after orthopedic surgery.

GlycOmega™ is *Perna canaliculus* from an exclusive New Zealand source. Unlike Perna extract-based products and mussel powders that may lack important fatty acids and other bioactive components (e.g. defatted powders or extracts), the entire organism is utilized in **GlycoFlex®**. Only **GlycoFlex®** products are formulated with GlycOmega™ Perna.

**GlycoFlex®** chewable tablets come in a chicken flavor that is highly palatable for easier delivery.

### PRODUCT DETAILS:

GlycoFlex® 2 Canine represents Stage 2 of our comprehensive stage of life program for dogs needing moderate joint support. These delicious natural imitation chicken flavored chewable tablets are also recommended for adult and maturing dogs, sporting and working breeds as well as support normal recovery after orthopedic surgery.
